Overview

This manual provides a parts reference for the Bally Gaming and Systems Slot Data Systems (SDS) Enhanced Player Interface (EPI) or Display with Magnetic Card Reader and Keypad (DMK). It provides EPI and DMK information for supported U.S., German and New Zealand manufacturers. Also included are tables of Installation Kit numbers, and Communication Interface Unit (CIU) upgrade kits.

To order an EPI or DMK kit, identify the machine manufacturer and the Model. Select the GMU Kit ID number, and/or the EPI or DMK Kit ID number. Both the EPI and DMK Kits consist of a keypad, display, card reader, bracket, and cable, unless otherwise noted. Bally Gaming & Systems supplies faceplates for Bally and IGT machines only. Bracket overlays are available for Bally, IGT, Williams, and Sigma machines.

EPI kits using an MC220+ require the additional purchase of a Mastercom 220+ Converter, part number K220+EPI-CNVTR. A list of the EPI component parts is included on Page 17.

The DMK kit, K-DMKNEUIM-COMP, the EPI kits K-EPI-000010112 (LCD Display) and the K-EPI-000020112 (VFD Display) are internal mount sub-assemblies. The metalwork for these kits is provided by the manufacturer, except for Bally and IGT. Bally provides the metalwork for these. A D2E is required for operation of a DMK system on a 250 board. The Mastercom 250 replaces any MC220+ using an EPI converter.

NOTE: xxxxxx in EPI Kit ID numbers (e.g. K-EPI304xxxxxx) are generic place holders for specific options. Refer to the EPI Code Description in the References and Notes section for an explanation of the Options, Metal Finish Chart, and Overlay Finish Chart.

For specific options regarding the -YY extension in the Overlay part numbers (e.g. M-R305251-YY) refer to the Overlay Finish Chart.

For specific options regarding the -ZZ extension in the DMK Kit numbers (e.g. K-DMK-205206-ZZ) or Faceplate part numbers (e.g. P-205244-ZZ) refer to the Metal Finish Chart.

NOTE: The DMK product line is no longer supported as a current product. All part numbers and information is given for reference. Most parts are still available for service and spares.

Basic Parts

Illustrated on the following pages are components of an SDS system. Each machine on the system has a Game Monitoring Unit (GMU) with an interface cable for data collection.

The GMU refers to any of the following configurations: Mastercom, Mastercom 220, Mastercom 220+, and Mastercom 250. A variety of programmed EPROMs ensure interface compatibility with the different processors and system server from other manufacturers.

GMU

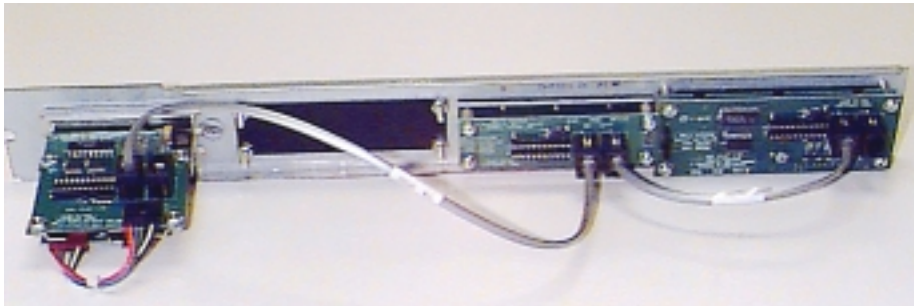

Faceplates, also called mounting brackets, refer to the metalwork where the player interface components are mounted. The components consist of card readers, icon buttons, keypads, and displays.

Faceplates

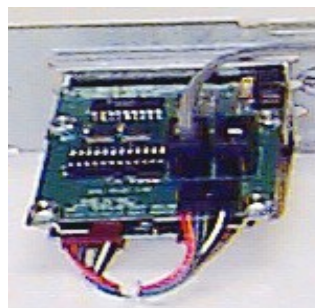

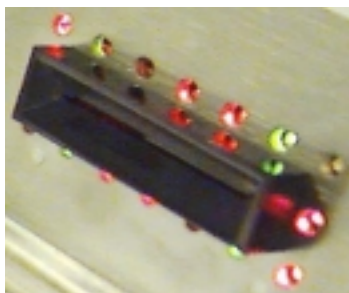

This is the front view of the display, keypad, blank, and cardreader components mounted to the faceplate.

This view illustrates the mounting of components on the faceplate.

Each machine may have an optional player interface to allow the player to collect points for awards, comps, or some other casino promotion. Employee cards allow the casino to restrict and monitor employee access to a machine and monitor functions performed to the machine. Player cards are used to identify the customer playing a particular machine.

Card Reader

Keypad

There are three types of keypads available. The “2x6” keypad has two rows of six buttons. The “3x4” keypad has four rows of three buttons. The keypad is used for logging service functions, paying jackpots, and processing fills.

2x6 Keypad

*3x4 Keypad
(DMK Only)*

*4x3 Keypad
(EPI Only)*

The optional icon buttons can be used by the player to request cocktails, change, or to reserve the game. They are available only for EPI products.

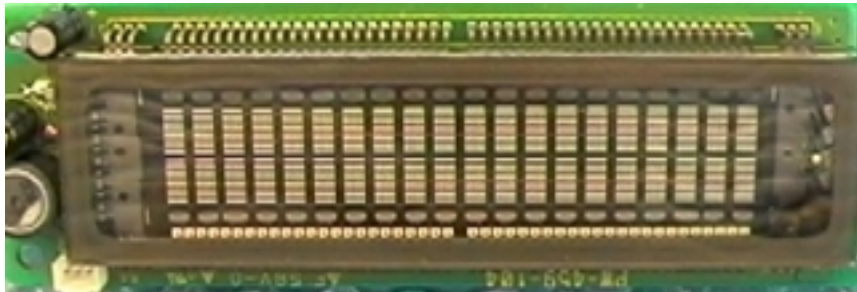

Icon Buttons

The latest and most popular display is the Vacuum Fluorescent Display (VFD). The VFD offers a better look and versatility over the Liquid Crystal Display (LCD). Both offer dual lines of text.

GameNet Kit Descriptions

K-GAMENET-1K through 8K -- Assembly, GameNet Rack Complete - 400 to 3200 Slots - The complete GameNet rack assembly includes all the necessary components needed for a new site GameNet install. Assembly Kit includes patch panels, adapters, an Ethernet Switch, two industrial PCs, an APC-UPS power supply unit, two hostess boards, the GameNet Switch Unit assembly kit, the 19" x 44" cabinet, and all necessary cables, and mounting hardware.

K-GAMENETADD1K -- Kit, Additional 1000 addresses -- The switch upgrade kit includes a patch panel, adapters, two GameNet Switch cards, and cables.

K-GAMENETEX1K -- Kit, add switch rack for additional 1000 addresses -- The switch rack upgrade kit includes all the necessary components to add an additional switch rack, with two GameNet switch cards.

K-CABINET-19-44 -- Cabinet, 19" x 44" -- Black -- The 19" x 44" cabinet is recommended to house all GameNet components.

K-GMNT-CRASHKIT -- Kit, GameNet Crash Assemblies - K-GAMENET-MON -- Asy, GameNet Monitor Card, K-GAMENET-PSU -- Asy, GameNet Power Supply, K-GAMENET-SW -- Asy, GameNet Switch -- The crash kit keeps extra parts on hand for replacement in the event of a failure.

K-GAMENET-SW1K through 4K -- Asy, GameNet Switch Unit, 1000 to 4000 Addresses -- The assembly kit includes all necessary components for a GameNet Switch Unit. This kit includes two switches for every 400 slots, up to eight.

CIU Kits

CIU KITS	
K-906318	Desktop Single Side, No Terminal Switching
K-CIU1000M8D	Basic CIU assembly
K-CIUADD1000M	Additional 1000 machines
K-CIUADD8D	Additional 8 machines
K-CIUEX1000M	Expansion rack for 1000 machines
K-TEREX8D	Terminal / Device expansion rack

K-906318 - Desktop CIU, Single Side - The desktop CIU is designed for use with a single computer (there is no SIU circuitry) and supports a maximum of 1000 machines.

K-CIU1000M8D - Basic CIU Assembly - CIU rack for 1000 machines, 8 devices. Rack includes (1) K-CIUADD1000M and (1) K-CIUADD8D. This is the base / master CIU rack which can support a maximum of 3000 machines and 16 devices. (Support of 3000 machines would require the addition of (2) K-CIUADD1000M and (1) K-CIUADD8D units.)

K-CIUADD1000M - Additional 1000 machines - CIU board kit to add 1000 machine capability to the CIU rack. This kit is for use in K-CIU1000M8D and K-CIUEX1000M racks and consists of the CIU boards and cables necessary to increase the maximum number of machines supported by the CIU by 1000 machines.

K-CIUADD8D - Additional 8 devices - CIU board kit to add support for 8 devices to a CIU rack. This kit is for use in K-CIU1000M8D and K-TEREX8D racks and consists of CIU boards and cable necessary to increase the maximum number of devices the CIU supports by 8 devices.

K-CIUEX1000M - CIU expansion rack equipped for 1000 machines. This rack includes (1) K-CIUADD1000M. This rack is the same basic rack as a K-CIU1000M8D, but it is a slave to the basic rack and allows the system to support an additional 1000 machines. Additional board kits may be added to this rack to support a maximum of 3000 machines and 16 devices. (Support of 3000 machines would require the addition of (2) K-CIUADD1000M and (2) K-CIUADD8D units.) This rack may be used in a K-CIUCABINET or K-CIUCABINET-19 cabinet.

K-TEREX8D - Terminal / device expansion rack equipped for 8 devices. This rack includes (1) K-CIUADD8D. The terminal device expansion CIU rack supports 8 devices and is slave to the K-CIU1000M8D rack. Two (2) additional K-CIUADD8D board kits may be added for a maximum of 24 devices for this rack. This rack may be used in a K-CIUCABINET or K-CIUCABINET-19 cabinet.

G-906318 - Desktop CIU, Single Side - The desktop CIU is designed for use with a single computer (there is no SIU circuitry) and supports a maximum of 1000 machines. This unit is for Europe 220VAC only.

CIU Kit Descriptions

Overlay Finish Chart

For -YY extensions in Overlay part number descriptions (e.g. M-R305251-YY), see the Overlay Finish Chart below for available options.

OVERLAY FINISH CHART - CASINO CODES	
DMK PRODUCTS	EPI PRODUCTS
-01= Standard Bally Product	-01= Standard Bally Product
-02= New York New York	-02= Wild Wild West

- NOTES:
- 1) The standard overlay color is: 01 - Generic
 - 2) -02 overlays are casino-specific. Custom examples are listed above.
 - 3) A Bonus Point Station w/ Mag Card Reader. Assembly number K-906419 is available for Park Place Entertainment casinos only.

DMK Metal Finish Chart

For -zz extensions in the DMK Kit number descriptions, (e.g. K-DMK-205206-zz) and Faceplate part number descriptions, (e.g. P-205224-zz), refer to the DMK Metal Finish Chart below for a description of available colors.

DMK METAL FINISH CHART
-01 = Mirror Stainless -MS = #8 Mirror Stainless
-03 = Bright Gold -PG = Gold Plated Over Titanium Nitrate
-04 = Brushed Gold -BG = Brushed Gold Plated Over Titanium Nitrate
-05 = Black -BK = Black
-06 = White -WT = White
-07 = Sungold -SG = Sungold
-08 = Red -RD = Red
-09 = Gold Vein -GV = Gold Vein

The following tables include the part numbers for Installation Kits, EPI Upgrade Compatible Kits, and CIU Kits.

Kit Part Tables

Installation Kits Table

INSTALLATION KITS		
Part #	Description	Notes
K-220-INS-SINGL	1 machine per base, 1 drop	Use with Belden Cabling
K-250-INS-SINGL		
K-220-INS-DOUBL	2 machines per base, 1 drop	
K-250-INS-DOUBL		
K-250-INS-QUAD	4 machines per base, 2 drops	
K-CAT5-SINGLE	1 machine per base, 1 drop	
K-CAT5-250-SINGL
